

1. In your **redbook** application, write the code for **RUD** APIs.
  1. <https://github.com/TAlRich/springboot-redbook.git>
    1. Branch: **02\_post\_RUD**
  2. you need to call the new APIs in your postman.
  3. You need to type it line by line and try your best to understand it. **DO NOT COPY PASTE**
2. GraphQL implementation
  1. add `mutation` for create POST
3. Add new Entity/Table/Type `Author`
  1. Create `CRUD` REST APIs for `Author`
  2. Create `Query` & `Mutation` GraphQL APIs for `Author`
